Office Action Summary

Application/Control Number: 10/749,329 Page 2

Art Unit: 1744

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 12/31/2003 has been considered and made of record.

Claim Objections

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 14-16 have been renumbered as claims 1-3, respectively. Note the application was originally filed with 3 claims numbered as claims 14-16 respectively which is improper. The originally filed claims should have been numbered as claims 1-3 since no other claims have been previously canceled in the instant application.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/749,329

Art Unit: 1744

Claim 1 appears to invoke 35 USC 112, sixth paragraph, with respect to elements (a) and (c) of the claimed apparatus. 35 USC 112, sixth paragraph, requires that the specification clearly set forth the structures that are associated and/or correspond with the claimed means. The instant specification fails to clearly set forth which structures, if any, correspond to the means recited in claim 1. As a result, the claim fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, "the electromagnetic waves" lack antecedent basis.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Powers (US 5,760,406).

With respect to claim 1, the reference of Powers discloses an apparatus that is structurally the same as that instantly claimed. Specifically, the reference of Powers discloses a device (10,12,14,16) for directing electromagnetic radiation towards a sample (18) wherein the energies emitted excite at least one intrinsic microbial fluorophore (See column 3, lines 27-34). The apparatus includes at least one detector (26, 30) capable of converting the emitted or reflected and scattered radiation into electrical signals wherein the detector is capable of detecting

Application/Control Number: 10/749,329

Art Unit: 1744

wavelengths above 320 nm (See filters 24 and 26). Finally the apparatus includes a device for analyzing the electrical signals to determine the presence of microbes (See column 4, line 66, to column 5, line 20).

With respect to claims 2 and 3, the apparatus disclosed by the reference of Powers directs the electromagnetic radiation towards the sample using time-modulated pulses (See column 8, lines 50-59).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The reference of Brewer (US 3,566,114) is cited as prior art that pertains to an optical system for emitting and detecting intrinsic fluorescence of microorganisms in the atmosphere.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Beisner whose telephone number is 571-272-1269. The examiner can normally be reached on Tues. to Fri. and alt. Mon. from 6:15am to 3:45pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gladys J. Corcoran can be reached on 571-272-1214. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
